MEMORANDUM FOR: Chief, Programs Division, ORR

25X1A ATTENTION: [redacted] Space and Support Branch

THROUGH: Chief, Requirements Branch, Reconnaissance Group, CGS

FROM: Chief, CIA/PID (NPIC)

SUBJECT: Zagorsk/Tyura Tam Missile Comparison

REFERENCES: (a) Requirement C-RR-4-81,049
(b) CIA/PID Project C 1566-64
25X1D (c) OAK - [redacted])

1. This memorandum is in response to your requirement dated 30 September 1964 which requests comparison of an object observed at Zagorsk Rocket Test
25X1D Facility, [redacted] with a probable missile component identified
25X1D at Tyura Tam Launch Area G-4 [redacted]

25X1D 2. The OAK for [redacted] includes the following statement in the description of the Zagorsk Rocket Test Facility:

"In the center of the facility is an object suspected to be either a 130-foot long missile on a rail siding, or a string of white rail cars."

Stereo analysis of this object and a close examination of earlier coverage of this facility by this division reveals the following:

a. The 130-foot long white object is not on a rail siding but alongside of one.

b. The object in question is, in fact, two light-colored, shed-like structures placed end to end, and each measuring 65 feet in length.

c. These structures are visible on photography dated as early as
25X1D [redacted]

3. It can be concluded that there is no relationship between these structures and the probable missile component observed at Tyura Tam, Launch
25X1D Area G-4 in [redacted]

GROUP 1
Excluded from automatic downgrading and declassification
